Clark-Reliance adds Ernst Flow Industries to the Family

On November 19, 2013, Clark-Reliance Corp announced the acquisition of Ernst Flow Industries (EFI). Based in Farmingdale, New Jersey, Ernst Flow Industries specializes in processing and industrial plant equipment and has built its reputation on product quality and customer service.

In April of 2002 the merger between The Ernst family businesses formed Ernst Flow Industries. The families brought together over 140 years of combined history, industry experience, and family tradition.

Clark-Reliance, the world leader in liquid level gauges and sight flow indicators for over 120 years, saw the opportunity to bring EFI into the Clark-Reliance offerings to complement and strengthen product offerings, and bring a higher service level to our customers.

Upon speaking with John Ernst he stated the move was a “perfect fit and the best of both worlds.” The relationship between the two companies dates back many years. In fact Eugene Ernst has a 1917 Ernst company ledger showing a purchase entry in the handwriting of George C. Ernst (1876-1967) for Reliance gauge products .

Together we will continue the tradition of providing quality products Made in the USA. Our customers will benefit from having even greater access to product offerings to help maintain or upgrade facility equipment, performance and safety personnel.

Welcome Ernst Flow Industries to the Clark-Reliance family!

If you have any questions regarding this acquisition, please contact Victoria Weber (440)-846-7643.
